LEXGO

BETTER ELECTRIC

THE ROAD TO BETTER ELECTRIC

LEXGO BRAND HISTORY

Founded in 2016 and inspired by the globally familiar phrase "Let's Go", LEXGO was born from a team of visionary designers and innovators in Italy. From day one, our mission has been to bring a smarter, more stylish approach to urban mobility: one that makes everyday travel easier, safer, and more enjoyable.

The Let's Go spirit is at the heart of everything we do. LEXGO is the natural choice for anyone who loves a better way of moving through the city. Better Electric is more than our motto, it's our commitment to creating the right mobility solutions, built on intelligent design, innovation, and real value.

This commitment drives our entire team: from sales and marketing teams in Italy, Romania, and the USA, to our R&D center and in-house manufacturing in China. Together, we focus on continuous innovation, strict quality control, and smart engineering to deliver products that genuinely improve our users' lives.

Your trust and support are the true energy that fuels our mission. With you, we'll continue building a community that lives and moves...

Better Electric. For a Better Life!

BETTER MOBILITY ECOSYSTEM

Every LEXGO vehicle is part of
an integrated ecosystem where design,
safety, and technology work together.

The result is not just a set of features,
but a connected lifestyle:

Better Electric. Better Life.

ITALIAN DESIGN INSIDE & OUT

Every LEXGO product carries the signature of Italian design, where form and function meet in perfect balance. From the first sketch to the final assembly, every curve, proportion and material is chosen with purpose. Even the packaging is conceived as part of the experience: clean, elegant and unmistakably LEXGO. Because great design doesn't end when the ride begins. It starts the moment you see it.
